

Esolang

Language type	Command type	Commands	JavaScript method
Stack based — Logical calculation — Not very esoteric	Basic definition	Default — True Place — Push Command — +	Stack based — Array Push Array.length
		Calculation — Commands — Logical — Not — @ And — ? Or — % Xor — ~ Xand — ^ Stack — Deletion — The last — - Method — Pop out the last two booleans Do the calculation Delete the original booleans and replace it with a new boolean.	Calculation — JS preset calculation Strong if prediction
	Output	Output the last thing #	Deletion and addition — Push Array[Array.length - 1]
			Compiling — Because there are no loops, so there are two main methods 1. Compile the first character and discard it from the input stream 2. Because there are only character commands, set an index i and listen stack[i] Prefer this one, because it is more simple and robust
